IJGIS Webinar Series

A monthly seminar featuring IJGIS authors

Mei-Po Kwan, PhD. Choh-Ming Li Professor of Geography and Resource Management, Director, Institute of Space and Earth Information Science, Chinese University of Hong Kong
Jue Wang, PhD. Assistant Professor, Geography & Planning, University of Toronto
Matthew Tyburski, PhD. Staff Scientist, Translational Addiction Medicine Branch, NIH (picture not shown)
David Epstein, PhD. Chief, Real-world Assessment, Prediction, and Treatment Unit, NIH
William Kowalczyk, PhD. Assistant Professor of Psychology, Hartwick College
Kenzie Preston, PhD. Scientist Emerita, National Institute on Drug Abuse, NIH

The paper demonstrates the importance of and methodology for the uncertainties of geographic context in studying environmental effects on health behaviors and outcomes. The paper is now freely accessible at https://doi.org/10.1080/13658816.2018.1503276

Dr. Kwan will present the research with new insights and recent advances for 30 minutes. **Drs. Wang, Epstein and Kowalczyk** will join her for a panel discussion with the audience.

China Time: May 20 @ 10pm (France May 20@4pm; UK May 20@3pm; US EDT May 20 @ 10am; Japan May 20@11pm; AUS AEST: May 21@midnight; New Zealand May 21@ 2am). Check your local date/time at https://www.timeanddate.com/worldclock/converter.html

Registration is free but required at https://tinyurl.com/448tsdnj or scan the QR code to register. The webinar link will be emailed to registrants directly before the webinar. Questions? contact May Yuan at myuan@utdallas.edu
